Please read the Offering Document to understand the investment policies and risks involved. Performance data does not include the cost incurred directly by an investor in the form of sales loads etc.

Message from CIO's Desk

The market remained uneasy for the month of January as the benchmark index fell during the first half of the month reaching a low of 38,443 points (-1,977 points) in the wake of political chaos and depleting FX reserves. However, with some positive news flow regarding the resumption of IMF negotiations and the government conceding to reforms associated with the IMF 9th review, the benchmark index bounced back to settle at 40,673 points with a marginal gain of 253 points (0.62% MoM).

Following the government decision to implement a free float exchange rate, the currency settled at PKR 268/USD at the end of the month, losing 15.47% on a MoM basis. The decline in FX reserves continued during the month as it fell to USD 3.09 billion down from USD 5.59 billion at the end of December 2022. Also, after the announcement of the MPS to raise the policy rate by 100 bps to 17%, the benchmark index rallied 2,403 points (6.3%) in the subsequent three sessions as the announcement was in line with the expectations and notably illustrated the governments resolve to address the economic crisis.

The market continues to trade at exceedingly attractive multiples with PE and PB of 3.9x and 0.6x with a discount of more than 40% as compared to their long-term averages. The market is also offering a healthy dividend yield of 11% which is the highest compared to its regional counterparts.

During the month, investor participation declined as volumes contracted by 2.36% MoM to PKR 176.90 million. Furthermore, foreigners remained net buyers with inflows of USD 8.74 million, certainly a key IMF condition of a "Free Float" currency is expected to bode well for foreign investors. Major buying was witnessed in Commercial Banks (USD 3.87 million) on the back of record interest rates and an imminent economic slowdown with expectations of a rise in Bank NPLs, and E&Ps (USD 2.97 million) on the back of Circular Debt Resolution Plan. On the local front, Individuals and Banks/DFIs remained net buyers with buying of USD 15.70 million and USD 5.54 million respectively. Whereas, Mutual Funds and Insurance Companies reported net selling of USD 20.99 million and USD 17.62 million, respectively.

Other significant developments and reports that affected investor sentiment during the month included:

- The Federal Board of Revenue (FBR) missed the collection target by almost 24% or PKR 225 billion due to a sharp decline in imports and delays in the collection of super tax from maximum taxpayers.
- Foreign currency inflows from overseas Pakistanis through Roshan Digital Account (RDA) were recorded at USD 140 million in December 2022, the lowest since December 2020.
- Pakistan was able to secure over USD 10 billion from different international financial institutions, donor agencies and development partners at the international conference on Climate Resilient Pakistan in Geneva.
- The Large scale manufacturing Index (LSMI) output declined by -5.49% in 5MFY23 compared to the SPLY as a result of expensive raw material costs in the light of currency devaluation, high interest rates, and global recession.
- The Current Account Deficit (CAD) for the month of December 2022 clocked in at USD 400 million, up +59% MoM from USD 252 million in November 2022 taking the 1H FY23 CAD to USD 3.67 billion against USD 9.09 billion, down -60% YoY during the same period last year primarily due to decline in imports.
- IMF announced to visit from January 31, 2023 to February 9, 2023 for 9th IMF EEF review.
- SBP reserves plunges to USD 3.7 billion with an import cover of only 3 weeks left.

We believe that implementing key reforms required for rejuvenating the stalled IMF program, will be positive for the economy and capital markets as a whole; especially, resolution of circular debt will inevitably unlock much needed liquidity and stock values.

The NCPI during the month of January 2023 clocked in at 27.55% YoY as compared to 24.47% YoY in December 2022. This took the 7MFY23 average NCPI to 25.40% compared to 10.26% during the SPLY. On a regional basis, the Urban CPI clocked in at 23.29% YoY, whereas, the Rural CPI was recorded at 28.54%. Reportedly, prime contributors to the increase in inflation were Housing, Water, Electricity, Gas, and Fuel (weight in CPI 23.63%) with an impact of 0.36% MoM / 7.83% YoY on the back of higher energy prices. Furthermore, a heavy increase was observed in the Food and Non-alcoholic Beverages Index (weight in CPI 34.58%) with an impact of 1.94% MoM / 42.94% YoY due to the increase in prices of tomato, pulses, vegetables, and cooking oil during the month.

During the month of January 2023, the SBP conducted three MTB auctions with a realized amount of PKR 1.75 trillion. The Weighted average yields for 3 months increased by 86bps to 17.8194% while bids were rejected for 6 months and 12 months. The upward movement in yields is a result of an increase in the discount rate by SBP to 17% in the Monetary Policy Committee held on January 23, 2023 to almost record levels, signaling that economic conditions would remain difficult at least in the near term. As per the auction target calendar for February – April 2023, the SBP targets to raise PKR 1.10 trillion against maturing amount of PKR 1.14 trillion in MTBs. The Next Monetary Policy Committee is scheduled to be held on March 16, 2023 in which we expect the central bank to further increase the policy rate by 50-100 bps to counter un-abating inflation.
