2.4 Risk Disclosure

Investors must realize that all investments in mutual Funds and securities are subject to market risks. Our target return / dividend range cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that include, but are not limited to:

- (1) Equity Risk** - Companies issue equities, or stocks, to help finance their operations and future growth. The Company's performance outlook, market activity and the larger economic picture influence the price of a stock. Usually when the economy is expanding, the outlook for many companies is good and the stock prices may rise and vice versa. Usually, the greater the potential reward, the greater the risk. For small companies, start-ups, resource companies and companies emerging sectors, the risks and potential rewards are usually greater. Some of the products and services offered by technology companies, for example, can become obsolete as science and technology advance.
- (2) Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (3) Voluminous Purchase/Redemption of Fund Units Risk** – Any significant transaction made of Units of a Fund, the Fund could temporarily have a high cash balance. Conversely, if the third party redeems large amounts of Units of a Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of your investment.
- (4) Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (5) Market Risk** – The risk involves volatility in stock prices resulting from their dependence on market sentiment, speculative activity, supply and demand for the securities and liquidity in the market. The volatility in securities prices results in volatility in the NAV based price of the Unit of the Fund.
- (6) Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments which may affect the Fund's performance etc.
- (7) Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.
- (8) Redemption Risk** - There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working

days of receiving a request for redemption from the investor.

(9) Distribution Taxation Risk: Dividend distribution may also be liable to tax because the distributions are made out of the profits earned by the Fund, and not out of the profits earned by each Unit holder. Unit holders who invest in a fund before distribution of dividends may be liable to pay tax even though they may not have earned any gain on their investment as return of capital to investors upon distribution is also taxable.

(10) Other Risks Involved:

- (a) Mismanagement of the investee company, third party liability whether through class action or otherwise or occurrence of other events such as stricks, fraud etc., in the company in which the investment is made.
- (b). break down of law and order, war, terrorist activity, natural disasters etc.
- (c). Senior rights of creditors over the shareholders in the event of winding up.

2.4.1 There may be times when a portion of the investment portfolio of the Scheme is not compliant either with the investment policy or the minimum investment criteria of the assigned 'category'. This non-compliance may be due to various reasons including, adverse market conditions, liquidity constraints or investment – specific issues. Investors are advised to study the latest Fund Manager Report specially portfolio composition and Financial Statements of the Scheme to determine what percentage of the assets of the Scheme, if any, is not in compliance with the minimum investment criteria of the assigned category. The latest monthly Fund Manager Report as per the format prescribed by Mutual Funds Association of Pakistan (MUFAP) and financial statements of the Scheme are available on the website of the Management Company and can be obtained by calling / writing to the Management Company.

2.5 Disclaimer

The Units of the Trust are not bank deposits and are neither issued by, insured by, obligations of, nor otherwise supported by SECP, any Government agency, the Trustee (except to the extent specifically stated in this document and the Deed) or any of the shareholders of the Management Company or any other bank or financial institution.
