Message from CIOs

The KSE-100 plunged by 1,112.33 points (down 2.4%MoM) during November 2021 and closed at 45,072.38 points as compared to 46,184.71 points last month. This bearish performance is attributed to an increase in interest rates, depreciation of local currency due to depleting reserves and mounting CAD coupled with delay in agreement between GOP and IMF for the revival of \$6 billion funding programme. The average daily traded volume surged by 14.68% to 316.11 million as compared to 275.64 million recorded during the month of October 2021. The increase in volume were primarily due to the intensive selling by foreign investors due to Pakistan's reclassification from the MSCI Emerging Market to MSCI Frontier Market. KSE-100 index closed at a forward P/E and P/B of 5.40x and 0.987x respectively, offering a healthy dividend yield of 7.6%.

Foreign investors remained net sellers during the month, with a net outflow of USD 141.34 million as compared to outflows of USD 30.87 million recorded during the last month. This has taken cumulative outflows during FYTD22/CYTD21 to USD 255.61/364.30 million. On the other hand, Companies, Insurance, Individuals and Mutual Funds remained net buyers with net inflows of USD 49.24 million, USD 29.56 million, USD 26.92 million and USD 16.04 million respectively.

Major news that impacted the market during the month included: 1) The CAD swelling to USD 5.09 billion during 4MFY22 i.e. 4.7% of GDP as compared to 1.4% of GDP in the corresponding period last year. 2) Pakistan and IMF reached staff level agreement 3) The SBP raised the policy rate by 150 bps to 8.75% as the balance of risk shifted away from growth and toward inflation and the current account. 4) Prices of all domestic petroleum products including LPG reached all-time highs. 5) The SBP signed agreement with the Saudi Fund for Development (SFD) for receiving USD 3 billion as deposits and USD 1.2 billion worth of oil supplies on deferred payments. 6) PKR depreciated further by 2% during November 2021 and reached an all-time low of PKR 175.72 against USD. 7) The SBP projected real GDP growth at 4-5% for year FY22 8) The emergence of the new 'Omicron' COVID-19 variant has become a concern globally following the news of which the oil prices in particular slumped considerably in the international market. 9) Inflows through Roshan Digital Account (RDA) reached USD 2.677 billion by end of October 2021 with 273,411 accounts.

CPI during the month of November 2021 surged by 11.53%YoY as compared to 9.19%YoY recorded during October 2021 taking 5MFY22 to 9.32%. Higher CPI was witnessed due to increase in international commodity prices coupled with depreciation of local currency.

On the Fixed Income front, yields of Government Securities have increased by more than 100 bps following increase in the policy rate and expectations of further tightening in the monetary policy. During the month, the SBP conducted two (2) MTB auctions with a cumulative realized amount of PKR 333.98 billion. Weighted average yields for 3 months MTB was 8.50%, up by ~12bps as compared to 8.38% in the last auction. Bids for 6 and 12 months MTB were rejected by the SBP. However, in the auction conducted on Dec 1, 2021 following the increase in the policy rate, the yields for 3, 6 and 12 months MTB increased to 10.39%, 11.06% and 11.35% respectively.
