MACRO PERSPECTIVE

The First Half of FY24 brought fresh tides of hope for Pakistan's economy but not without its own set of challenges. Pakistan saw a major decline in imports as high inflation along with record high interest rates inevitably led to demand compression, coupled with progressive efforts to ensure parity to the exchange rate via blockade of illegal channels. However, the continuous improvement on the External Front while encouraging has been offset by dwindling figures of the Real Sector with LSMI output for Jul-Nov 23 period showing a decline of 0.8% when compared to SPLY. In light of these figures and slower-than-expected moderation in inflation, SBP has kept its GDP Growth rate forecasts at a moderate 2-3% for FY24 despite negative growth rate in FY23 (-0.475%). Further complicating issues were the uncertainties around General Election results which understandably dampened any hope of an amicable and peaceful transition of power. Ongoing and growing instability in the region has further impeded the already slow-paced economic recovery amid high cost of doing business, evident through more than twice the increase in freight costs from Asia to Northern Europe since the start of attacks by Houthi rebels on commercial vessels in the Red Sea further aggravating inflationary pressures.

On the Fiscal Front, there was positive news as both tax and non-tax revenues showed strong growth. Non-tax revenues increased amidst substantial growth in petroleum development levy and transfer of sizable SBP profit while Tax revenues grew as FBR achieved its Target for the first six months of Rs.4425 billion (as agreed with the IMF) by recording collection of Rs.4468 billion. FBR in the corresponding six months of the previous year collected Rs.3428 billion, thus registering an increase of more than 1 Trillion. Furthermore, on January 17th, 2024 Pakistan received a USD 700 Million 2nd loan tranche from the International Monetary Fund (IMF) under the nine-month Stand-By Arrangement (SBA), this development came shortly after the Executive Board of the IMF completed the first review of Pakistan's economic reform program under the SBA. Pakistan to date has received \$1.9 billion disbursements out of the total \$3 billion under the nine-month SBA with further progress strongly dependent on the successful and peaceful transfer of power to a democratically elected government through the general elections.

The prolonged monetary and fiscal tightening took its toll on the real sector with LSMI output for Jul to Nov 23 declining by 0.8% compared to SPLY. The sectors majorly contributing to the overall decline included Textile, Automobiles, Furniture and Tobacco. Agriculture output, however, saw some positive developments as yield on Kharif crops already turned out better than last year while the prospects for Rabi crops also appeared promising amid better input conditions.

On the monetary front, the Monetary Policy Committee (MPC) in its meeting on January 29th 2024, kept the policy rate unchanged at 22%, contrary to market expectations of a nominal cut, created by lower cutoff yields of recently concluded T-Bills and Ijarah Sukuk auctions. The decision took into account the impact of sizable adjustments in administered energy prices from Nov 23 onwards on inflation, despite the presence of some offsetting developments like the recent stability in international oil prices and improved availability of agricultural produce. The Committee also noted that core inflation continues to moderate in line with the Committee's expectations. Further, the Committee assessed that the real interest rate continues to be positive on a 12-month forward-looking basis while inflation was expected to recede in the foreseeable future.

The NCPI during January 2024 clocked in at 28.34% YoY as compared to 29.66% in December 2023 and 27.55% in January 2023, taking 7MFY24 average NCPI to 28.73% compared to 25.40% during the SPLY. On a regional basis, Urban and Rural CPI was recorded at 30.23% and 25.69% respectively. The slow pace of decline in inflation can be attributed to frequent and sizeable adjustments in administered energy prices which has also impeded expectations of a sustained decrease in inflation. On the other hand, notably non-energy inflation continues to moderate, in line with SBP's projections.

On the external front Current Account recorded a surplus for the month of Dec 2023 of USD 397 million, the first since Jun 23, compared to a deficit of USD 15 million (revised) in Nov 2023 taking the HFY24 Current Account Deficit (CAD) to USD 831 million against CAD of USD 3.63 billion SPLY, down 77% on the back of decline in imports, increase in exports and other current transfers. The HFY24 total Imports stood at 30.44 billion USD down by 10% SPLY, total exports stood at 19.06 billion USD up by 10% SPLY, while a steady exchange rate also boosted workers' remittances as the 2nd QFY24 recorded remittances of 7.10 billion USD up by 10% when compared to the corresponding quarter last year.

SBP foreign exchange reserves also saw massive improvement with a remarkable increase of 85% since the start of FY24, clocking in at USD 8.22 billion at the end of Jan 2024. The gains were attributable to the unlocking of the 1st and 2nd Tranche under the IMF SBA through which Pakistan received USD 1.9 billion and was further augmented by relatively higher export earnings and workers' remittances.

EQUITY MARKET REVIEW

During HFY24, after two years of relative underperformance, the equity market staged a massive comeback reaching new heights and making new records. The index KSE 100 increased by 20,998 points, generating a huge return of 50.66% with elevated levels of average daily volume of 476.60 million compared to 217.83 million shares SPLY. During the period, investors celebrated improving macros with an appreciating currency while weathering through hard but essential steps taken by the caretaker setup to ensure sustainability for the country. Despite these impressive feats; however, as CY24 approached new challenges emerged which threaten to derail the momentum gained throughout FY24. Of the foremost concern was the smooth and peaceful transition of democratic power, the expectations of which have fallen severely short following which sentiment has once again been marred by the uncertainty and indecisiveness surrounding the announced election results. Further, this growing political unrest is taking place against the background of increasing international tensions and widening fronts of conflict in the region coupled with Pakistan's fiscal position and the dire need to initiate talks with the IMF for a subsequent support program illustrates our precarious state.

Investor participation during HFY24 increased significantly by 119% with 476.60 million average daily volume compared to 217.83 million shares SPLY. Foreign Portfolio Investment also saw a huge increase with net buying of USD 71.01 million compared to net selling of USD 0.96 million SPLY. Major net buying was recorded in sectors of Commercial Banks--USD 24.13 M, Power Generation & Distribution --USD 15.714 M and Cement -- USD 14.77 M. On the local front, only Insurance and Corporations remained net buyers with buying of USD 60.32 M and USD 52.45 M respectively.

Breaking down the performance sector-wise showed all sectors in green with Refinery (94.74%), Close End Mutual Fund (90.16%), Power Generation & Distribution (87.01%), Transport (77.59%) and Leather & Tanneries (73.60%) among top performers during HFY24. Weak Performers included Real Estate Investment Trust (0.27%), Vanaspati & Allied Industries (3.0%), Textile Spinning (6.72%), Woollen (7.24%) and Modarabas (8.76%).

During the 10-year period, the KSE - 100 index yielded an annualized return of 9.47% while in the same period, the USD appreciated by 10.27% annually against PKR which has caused foreign investors to stave off from Pakistan Equity Market. The situation, however, has changed since the start of FY24, with USD depreciating 2% against PKR to close at 280.97 as at 31st Dec 23, the relative stability in exchange rates has piqued foreign interest with net buying of USD 71.01 million putting a brake on the continuous net selling of past few years. It is imperative for the current caretaker and then the incumbent government to enact and implement policies that continue to facilitate the relative stability in exchange rates, if the equity market is to continue the path it charted in HFY24.

Despite vast gains recorded during the period, the market continues to trade at exceedingly attractive PE and PB multiples of 4.72x (Earnings Yield of 21.19%) and 0.78x respectively, along with a healthy dividend yield of 10.29% as at 31st Dec 23. Our pro-equity stance is based on expectations of continued macroeconomic improvement through fiscal consolidation and timely realization of planned external inflows which shall help in bringing down the current elevated levels of inflation to the SBP target of 5-7 percent by mid-CY25. This in turn should bring down the Risk-Free Return and Earnings Yield to their historical average of 10% and 12.5% respectively.

FIXED INCOME REVIEW

During HFY24, the State Bank of Pakistan maintained the policy rate at all-time high levels of 22% in response to un-abating inflationary pressures, with the average NCPI for HFY24 soaring to 28.79%, and the pressing need to fortify the country's volatile external account.

The heightened policy rate played a significant role in maintenance of elevated rates of government securities, attracting substantial investments into these instruments as investors sought improved returns offered by government debt securities despite having an alternative in the face of high performing equity market.

During the period HFY24, the State Bank of Pakistan conducted a total of thirteen (13) Market Treasury Bill (MTB) auctions, where the government managed to raise PKR 15.78 trillion against the auction target of PKR 16.34 trillion. Notably, the weighted average yields for 3, 6 and 12-month MTBs were 21.32%, 21.36% and 21.34%, respectively, down by 67 bps, 56 bps, and 64 bps compared to the end of FY23.

To further address the need for liquidity, SBP also conducted six (6) auctions of fixed-rate Pakistan Investment Bond (PIB) and was successful in raising PKR 0.95 trillion. The weighted average yields for 3Y, 5Y and 10Y PIBs stood at 16.92%, 15.81% and 14.97% down by 255 bps, 27bps and 35bps respectively, since the start of FY24.

In the market for Shariah Compliant instruments, the SBP conducted a total of six (6) auctions of GOP Ijara Sukuk, both Variable Rental Rate (VRR) and Fixed Rental Rate (FRR). These auctions successfully raised PKR 1.24 Trillion against the auction target of PKR 1.22 Trillion.

Moreover, during HFY24 the State Bank of Pakistan carried out 61 Open Market Operations (OMOs) with varying maturities, injecting PKR 45.39 trillion into the market at an average cut-off yield of 22.08% and mopped up PKR 4.38 trillion at an average cut-off yield of 21.99%.

Looking ahead to the auction target calendars for February through April 2024, the State Bank of Pakistan aims to raise PKR 1.53 trillion by issuing 3 to 12-month MTBs against the maturing amount of PKR 1.731 trillion. Additionally, the SBP targets to raise PKR 505 billion through 3 to 30-year fixed-rate PIBs and PKR 810 billion through floating-rate bonds.

EQUITY MARKET REVIEW

9.2 Sindh Sales Tax at the rate of 13% (30 June 2023: 13%) on gross value of management fee under the provisions of Sindh Sales Tax on Services Act, 2011.

9.3 The Management Company has charged the expenses allocated by the Management Company at the rate 0.6% (30 June 2023: 0.5%-0.6%) of the average daily net assets.

9.4 Federal Excise Duty payable amounting to Rupees 16.592 million has been transferred from Golden Arrow Selected Stock Fund to Golden Arrow Stock Fund on the effective date of conversion (25 November 2019)

As per the requirements of the Finance Act 2013, Federal Excise Duty (FED) at the rate of 16% on the remuneration of the Management Company was applied with effect from 13 June 2013. The Management Company is of the view that since the remuneration is already subject to the provincial sales tax, further levy of FED results in double taxation, which does not appear to be the spirit of the law. The matter was collectively taken up by the Management Company jointly with other Asset Management Companies and Trustees of respective Collective Investment Schemes (CISs), through a Constitutional Petition filed in the Sindh High Court (SHC) during September 2013. In this respect, the SHC had issued a stay order against the recovery of FED due to which the Fund has not made any payments for FED since 13 June 2013.

On 30 June 2016, the SHC had passed a judgment that after 18th amendment in the Constitution of Pakistan, the Provinces alone have the legislative power to levy a tax on rendering or providing services, therefore, chargeability and collection of FED after 01 July 2011 is ultra vires to the Constitution of Pakistan. On 23 September 2016 the Federal Board of Revenue (FBR) filed an appeal in the Supreme Court of Pakistan (SCP) against above judgment, which is pending adjudication. Management Company, as a matter of abundant caution, has maintained full provision for FED aggregating to Rupees 16.592 million until the matter is resolved. Had the provision not been retained, the net asset value per unit of the Fund as at 31 December 2023 would have been higher by Rupees 0.1644 (30 June 2023: Re. 0.1545) per unit.

Through Finance Act, 2016, FED on services rendered by Non-Banking Financial Institutions (NBFIs) including Asset Management Companies, which are already subject to provincial sales tax, has been withdrawn.

Therefore provision for FED has not been recorded in these financial statements from 01 July 2016 onwards.

17. FAIR VALUE OF FINANCIAL INSTRUMENTS

IFRS 13 - 'Fair Value Measurement' establishes a single source of guidance under IFRS for all fair value measurements and disclosures about fair value measurement where such measurements are required as permitted by other IFRSs. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the close of trading i.e. period end date. The estimated fair value of all other financial assets and financial liabilities is considered not significantly different from book value as these are short term in nature.

The following table shows financial instruments recognised at fair value based on:

- Level 1: quoted prices in active markets for identical assets or liabilities;
- Level 2: those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- Level 3: those with inputs for the asset or liability that are not based on observable market data (unobservable inputs).
